

ARROW SERIES

Jacquard Machine Labeling on selvages

TOOL FREE DESIGN

Thanks to AMAR revolutionary positioning design, now weavers are able to position the Jacquard heads at any point on the reed width without any tool.

Intuitive Jacquard controller AMAR

- Industry 4.0 compliant and designed to be the future of digitalization
- New intelligent electronic architecture which ensures accurate and verified data transmission
- User-friendly interface with larger capacity
- Compact construction design provides outstanding dimensional stability
- Stress free responsive control

Jacquard Machine ARROW SERIES

for Labeling on selvages

The new generation of Name Jacquard machines, the ARROW SERIES, provides true added value to premier fabrics by enabling the brand name to be woven into selvages, hereby guarding against counterfeit.

The high-performance ARROW SERIES Jacquard machine is particularly suitable for weaving custom labelling into selvages and fabrics of designer garments woven with wool or cotton.

Advantages

- Robust, dust-proof, ergonomic design ensures stable and vibration-free machinery
- Highly adaptable to weaving reed width
- New Mini-Quick connector facilitates hooking and unhooking the harness cords
- User-friendly AMAR controller with intuitive Display and brand new mechatronics design enhances stability of signal transmission
- Dramatically reduced maintenance and easy servicing
